Formulas in a short report

The energy of a body at rest is $E = mc^2$, where c is the speed of light in a vacuum.

The attention of one layer is written as a display formula:

$$\mathrm{Attention}(Q, K, V) = \mathrm{softmax}\left(\frac{QK^\top}{\sqrt{d_k}}\right)V$$

The sample mean and its variance:

- the mean $\bar{x} = \frac{1}{n}\sum_{i=1}^{n} x_i$ of the sample
- the variance $s^2 = \frac{1}{n-1}\sum_{i=1}^{n}(x_i - \bar{x})^2$

Shape	Area
Circle	πr^2
Triangle	$\frac{1}{2}bh$

$$f(x) = \begin{cases} x^2 & x \geq 0 \\ -x & x < 0 \end{cases}$$

A last paragraph names a_{ij} and $\alpha + \beta$ inline, and the money stays text: from $5 to $10.
